PEDIATRIC INFECTIOUS DISEASE FELLOWSHIP OPPORTUNITY

The Division of Pediatric Infectious Diseases at the Hasbro Children’s Hospital and the Alpert Medical School of Brown University has an unexpected opening for a fellowship position at the first-year level (PGY-4) beginning immediately. The majority of clinical training takes place in the 87 bed Hasbro Children’s Hospital which is the only Level 1 Pediatric Trauma Center in the state with an average of 6,500 inpatient and 70,000 outpatient visits in a year. Training also occurs at the Women & Infants Hospital of Rhode Island. Each year, Women & Infants delivers 8,400 babies making it the eleventh largest stand-alone obstetrical service in the country. The hospital has an 80 bed NICU and 60 newborn bassinets.

Our 3-year program provides training and exposure to a wide variety of clinical pediatric infectious diseases. Fellows spend 12 months on the inpatient consultation service. Outpatient experience includes longitudinal clinic experiences in general infectious diseases, HIV, and tuberculosis. In addition, fellows participate in microbiology and infection control dedicated rotations. Fellows spend the majority of their second and third years conducting independent research project(s), which may be clinical, translational, or bench-based in nature. Training includes a fellows' journal club, a fellows' research methodology course, core curriculum and many opportunities for lecture and case presentations. This position is open to individuals who have successfully completed a pediatric residency program. Funding is guaranteed for all 3 years.

Interested candidates may contact fellowship director, Penelope Dennehy MD, with any questions by email, at This email address is being protected from spambots. You need JavaScript enabled to view it.
