Seeking Candidate for Pediatric Infectious Diseases, Clinical Attending Faculty, Full-Time Position  
Boston Children’s Hospital

The Division of Infectious Diseases at Boston Children’s Hospital in Boston, Massachusetts is seeking to recruit an outstanding pediatric ID physician to provide exceptional clinical care within our inpatient and outpatient consulting practices. The successful applicant is expected to be board-certified or board-eligible in pediatric infectious diseases and have a strong commitment to patient care and trainee education.

The position involves primarily clinical and teaching responsibilities:
- Inpatient pediatric infectious diseases consultation
- Outpatient infectious diseases clinic
- Teaching of medical students, residents, nurse practitioners, and clinical fellows

The desire to develop clinical innovations in areas such as telemedicine and other aspects of expanding and improving patient care delivery will be an integral component of this position. Opportunities for leadership positions within our pediatric ID fellowship program and division quality improvement committee for those candidates with experience and interest in these areas may also be included with this role.

Candidates will have the opportunity to pursue clinical scholarly activities including inpatient and outpatient practice guideline development and quality improvement activities. The position includes a faculty appointment at Harvard Medical School. Academic rank will be commensurate with qualifications.

Boston Children’s Hospital is an academic teaching hospital and a world-renowned medical and surgical referral center. The division of Pediatric Infectious Diseases includes 32 faculty, 12 fellows, and nearly 50 research staff and postdoctoral fellows. Our inpatient consult services include both general ID and immunocompromised ID teams. Our outpatient clinics include general pediatric infectious diseases, immunocompromised infectious diseases, perinatal infections management, HIV care, and outpatient parenteral antibiotic therapy (OPAT). We have a well-established program in pediatric antimicrobial stewardship and hospital infection control and prevention. Research in the division spans basic science, clinical investigation, and epidemiology and population health.

Interested applicants should forward their curriculum vitae and a cover letter detailing their interest to Tanvi Sharma, MD, MPH (Tanvi.sharma@childrens.harvard.edu). Boston Children’s Hospital is an Equal Opportunity/Affirmative Action Employer.
