**PEDIATRIC INFECTIOUS DISEASE FELLOWSHIP**

The Division of Pediatric Infectious Diseases at Columbia University Medical Center, New York, New York has one opening for a fellowship position at the first year level (PGY-4) beginning July 1, 2019. Our 3-year program provides exceptional training and exposure to a wide variety of clinical pediatric infectious diseases as well as research opportunities.

Fellows’ research opportunities may be clinical, translational, or bench based. Areas of focus include the following:

- Neonatology/Women and Infant Health
- Vaccine Safety and Efficacy
- Host/Pathogen Interactions (translational research, microbiome research and bioinformatics)
- Hospital epidemiology and Antimicrobial Stewardship

Interested candidates may contact fellowship coordinator Julia Zhou with any questions by email at jz78@cumc.columbia.edu. You may also contact Dr. Natalie Neu (nn45@cumc.columbia.edu, 212-305 9683) the program director for additional information.
